

BAGS TO BENCHES PROGRAM

The Lake Tulloch Lions Club's Bags to Benches Program is a Community Success Story...

The Lake Tulloch Lions Club has taken a significant step towards environmental conservation through its innovative recycling program in partnership with Trex™. This initiative encourages the community to collect and recycle plastic bags, which are then transformed into Trex™ furniture benches. For every 1000 lbs of plastic collected, the community is rewarded with a bench, enhancing local spaces while promoting sustainability.

So far, the program has been a resounding success, with enough plastic recycled to create two benches. These have been thoughtfully placed at Black Creek Park and the Copperopolis Cemetery, serving as a testament to the community's commitment to the environment. The program's success is a reflection of the collective effort, as residents have enthusiastically embraced the cause, contributing to a greener future.

The Lake Tulloch Lions Club extends its gratitude to all participants and supporters of the recycling program. Their dedication has not only facilitated the transfer of plastic bags but also fostered a sense of unity and environmental responsibility within the community.

For those inspired by this story and looking to contribute, the Lake Tulloch Lions Club welcomes new volunteers. Getting involved is a chance to make a tangible difference, helping to sustain this vital program and ensure its continued success. It's a win/win for both the community and the planet, and every helping hand counts.

Join the Lake Tulloch Lions Club in their mission to recycle, repurpose, and revitalize. Together, we can keep our community—and our world—a little greener.
